

1. Based on the requirements in Section L, 5.3.1 Basis of Estimate for Blended Rate (Composite) Labor CLINS, 5.5.2 Scenario B: Representative Customer Workload, and 5.5.3 Scenario C: Sample Task. Request Government clarification for the following:

Is it the intent of the Government for the bidder:

to use a direct GFY mapping of the wrap rate developed for each individual GFY in Scenario C to the corresponding GFY hours for award and option years specified in Scenario B (e.g. if the wrap rate for Scenario C, GFY 04 is \$XX.XX then the response for Scenario B, GFY 04 would be \$XX.XX multiplied by the 170,000 hours specified);

or

for the bidder to take a consolidated wrap rate established for the entire Scenario C time period and apply it to each of the individual GFY hours specified for the award year and option years?

The Second assumption is Correct.

The bidder should take a consolidated wrap rate established for the entire Scenario C time period and apply it to each of the individual GFY hours specified for the award year and option years.
